

WHY CHOOSE ULTIMATE FLORA?

High Culture Count

Ultimate Flora CRITICAL CARE is a probiotic for people who have occasional digestive upsets or are looking for a high culture count probiotic. Each capsule contains 50 billion live cultures of 10 strains of beneficial flora.*

One Capsule Per Day

Just 1 Ultimate Flora capsule = 3 capsules of other probiotics

To receive 50 billion cultures per day, you would need to take more than 3 capsules of a probiotic with only 15 billion cultures per capsule!

Delayed Release Capsule

Stomach acid can destroy probiotics. Ultimate Flora CRITICAL CARE delayed release capsules are designed to resist stomach acid to help ensure more probiotics reach your digestive tract.

SUPERIOR HEALTH BEGINS IN THE DIGESTIVE SYSTEM

WHAT ARE PROBIOTICS?

Probiotics are beneficial bacteria that live in the intestines. Lactobacilli probiotics are most prevalent in the small intestine, and Bifidobacteria probiotics are most prevalent in the large intestine (or colon). The average intestinal tract contains more Bifidobacteria than Lactobacilli.

HOW IS ULTIMATE FLORA DIFFERENT?

Ultimate Flora contains 10 different strains of beneficial probiotics (Bifidobacteria and Lactobacilli). Some other brands contain only Bifido or only Lacto. Since you have many different strains of probiotics in your intestinal tract, more strains (B's and L's) may be better.*

WHY IS A HIGH BIFIDO PROBIOTIC IMPORTANT?

As we age, our level of Bifido declines. Ultimate Flora CRITICAL CARE contains 60% Bifido to help maintain a healthy digestive environment.*

WHAT TO LOOK FOR IN A PROBIOTIC SUPPLEMENT:

- ▶ At least 10 probiotic strains
- ▶ High culture count with Bifidobacteria & Lactobacilli strains (B's and L's)
- ▶ Delayed release capsule
- ▶ Potency until time of consumption†
