What is Heartburn?

Heartburn is caused when stomach acid is pushed up into the esophagus. This may result in a painful burning sensation.

For Additional Support Try:

IndigestionSTOP is an advanced digestive enzyme formula with soothing herbs and added HCl to help address low HCl production.*

Too Much vs. Too Little Stomach Acid.
Heartburn is sometimes caused by too little stomach acid. For those who do not always produce enough stomach acid, a supplement with added HCl helps maintain healthy levels of stomach acidity.*

Digest Smart Critical is a high-potency digestive enzyme supplement made with 25 plant-based enzymes to specifically target difficult digestive zones.*

How do Enzymes Help?

Occasional digestive difficulties such as heartburn, sour stomach, gas, and bloating may be caused by a lack of enzymes in the diet. Enzymes help break down food so the body can absorb its nutrients. Because over processing can deplete the natural enzymes in foods, you may find benefit in taking a digestive enzyme supplement with every meal.*

RENEWLIFE
The Digestive Care Experts

Free of GMOs, yeast, salt, gluten, dairy, animal products, preservatives, and artificial ingredients.

HEARTBURNSTOP contains powerful herbs and minerals to support healthy stomach acid levels and help neutralize stomach acidity for fast-acting, temporary relief of occasional heartburn.* Additional ingredients, in a delicious natural raspberry base, may help soothe and protect the lining of the esophagus and the stomach.*

HEARTBURNSTOP includes:

Pomegranate and Raspberry Extracts with Ellagic Acid: Naturally occurring antioxidants found in pomegranates and raspberries support healthy levels of stomach acidity and healthy structures of the stomach and esophagus.*

Calcium, Magnesium, Apple Pectin, Fava Bean: Help neutralize stomach acid temporarily.*

Aloe Vera Extract and L-Glutamine: Maintain normal, healthy stomach lining structure and function.*

Papain: A natural digestive enzyme derived from papaya fruit assists digestion and helps maintain healthy tissue structures.*
