

Ribose is an essential pentose (5-carbon) sugar utilized by the body to synthesize DNA, RNA and produce energy. Ribose is a fundamental building block of adenosine triphosphate (ATP – the substance in which the body stores intracellular energy), the preferential source of energy for skeletal muscle and heart tissue. Studies have shown that ribose supplementation can enhance cardiac energy levels and support cardiovascular metabolism.* Further studies suggest that ribose plays a role in supporting energy recovery after exercise.* Exercise increases free radical production in muscle tissue. Ribose may strengthen and support the body's crucial antioxidant defenses.*

Research suggests that optimal heart function requires a consistent supply of essential cofactor nutrients including CoQ10, D-ribose, L-carnitine and Magnesium. Consider these other high quality Doctor's Best products in combination with Best D-Ribose for enhanced cardiovascular support: High Absorption CoQ10, High Absorption Magnesium, Best L-Carnitine Fumarate

Use of BioEnergy Ribose™ is licensed by BioEnergy Life Science, Inc. under U.S. Patents 6,159,942; 6,534,480; 6,159,943; 6,429,198 and other U.S. and foreign patents issued and pending.
