

PREMIER SCIENCE

The body's friendly bacteria normally keep yeast levels in balance. Yeast Formula™ herbal blend was developed because this balance is so important.* This supplement includes high-quality oil extracts of oregano, thyme, and peppermint with a standardized extract of goldenseal root. Scientists recognize that the volatile oils of oregano and thyme play a role in digestion and other body functions.* Peppermint oil is widely used in Europe to support colon function.* And goldenseal contains alkaloid compounds that show great promise for human health.*

Integrative Therapeutics' evidence-based natural medicines are the only choice of doctors who rely on the fact base of premier science to deliver patient results.
