

Heart Health Omega is a naturally sourced, uniquely concentrated omega-3 dietary supplement with EPA (eicosapentaenoic acid) and DHA (docosahexaenoic acid) which helps support optimal heart health. Research has shown a 2:1 ratio of two omega-3 fatty acids, EPA and DHA, to be ideal for heart health. These fatty acids from ocean fish help support healthy blood flow and already normal lipid levels.[∞] Supportive, but not conclusive, research shows that consumption of EPA and DHA omega-3 fatty acids may reduce the risk of coronary heart disease.[∞] See Supplement Facts panel for total fat content.
