

ORAC (Oxygen Radical Absorbance Capacity) **Energy® Protein & Greens** is the next generation of superfoods. Just one serving contains 10 grams of protein, the antioxidant power of over 12 servings of fruits and vegetables and a total ORAC score of over 20,000.* It contains certified organic pea protein and over 42 certified organic and pesticide free ingredients.

The essential amino acid profile of our pea protein is very close to that of the ideal protein. Other vegetarian sources such as rice or soy can lack in the percentage profile for certain essential amino acids. Pea protein is easily assimilated and has a sustained release transit time, which means it has excellent digestibility and keeps working. We have further enhanced this with the addition of the plant derived enzyme Aminogen®. Research shows Aminogen® to increase branched-chain amino acids by 250%, increase plasma amino acid levels over 100%, increase glutamine levels by 90%, increase arginine levels by 80%, increase nitrogen retention by 32%, promote lean body mass, aid in muscle recovery, and may provide less gas, bloating and constipation.*
