

Suggested usage: 1 capsule 1-3 times per day or as directed by a health professional.

Cautions: As with any supplement, consult your health professional before use if you are pregnant, breastfeeding, or trying to conceive, or if you are taking medication, have a medical condition, or anticipate a surgery. Keep out of the reach of children.

Phosphatidylcholine (PC) is a fatty acid-like compound naturally found in foods. Natural Factors PC is naturally produced from fractionated non-GMO safflower oil. It then undergoes a microencapsulation process for improved solubility and absorption. PC has been shown to be helpful in managing occasional pain and discomfort.*

Manufactured by Natural Factors to ensure safety and potency in accordance with Good Manufacturing Practices (GMP) of the FDA and Health Canada.

Contains no artificial colors, preservatives, or sweeteners; no dairy, starch, sugar, wheat, gluten, yeast, soy, corn, eggs, fish, shellfish, animal products, salt, tree nuts, or GMOs. Suitable for vegetarians/vegans. Sifted for your protection. Do not use if seal is broken. For freshness, store in a cool, dry place.

*This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

THE POWER OF PHYTORESPONSE

PhytoResponse® refers to plant foods and herbs that can modulate and positively influence the Endocannabinoid System (ECS) directly or indirectly and support the body's production of endocannabinoids with non-psychoactive, plant-based herbal compounds.

ECS - It's all about balance. The ECS promotes homeostasis, or balance, which is what being healthy is all about.

THE POWER OF PEA AND THE ENDOCANNABINOID SYSTEM

Phosphatidylcholine (PC) is an endogenous fatty acid amide that belongs to the family of biologically active lipids that are released by the body to soothe discomfort. PC is a member of the ECS with several biological functions, including neuroprotective activity in the central nervous system. It has been demonstrated to be effective on the different inflammatory mechanisms that develop and maintain both neurogenic and neuropathic pain.

PURE PEA

There are two sources of PEA commercially available. Synthetic forms require the use of powerful synthetic acids. PEA can be naturally derived from safflower oil. PEA 400 only utilizes naturally derived phytolipids from safflower seed.
