

DGL has become known as "The Lining Tamer" for a very good reason!

Studies have shown that DGL stimulates and accelerates the natural protective factors in the digestive tract, which helps relieve stomach discomfort immediately.* DGL from Enzymatic Therapy® is a unique extract of deglycyrrhized licorice widely used in Europe. It's chewable because saliva enhances the effect of DGL's natural compounds. In DGL, the glycyrrhizin compound—associated with high blood pressure—has been removed.

Put "The Lining Tamer" to work for you!

Recommendations: Chew two tablets twenty minutes before each meal.

If pregnant, nursing, or taking prescription drugs, consult your healthcare practitioner prior to use.

ETI is an FDA-registered drug establishment.

*SPINS Licorice Ingredient Brand Report:
(52 wks ending 2-20-10; total US X-WF).
