We find the fantastic in Mother Nature, optimize clinically studied ingredients, and always listen to what the newest science has to say. Season after season, we obsess over helping you get dynamic about your weight loss goals.

Discover more proven weight management solutions at bodydynamix.gnc.com.

*A randomized clinical study of 140 healthy overweight people compared the use of Slimvance® in conjunction with an 1800 calorie diet and walking plan to a placebo with the same diet and walking plan. Those on Slimvance® lost 1 more pound (-1.46 pounds versus -0.42 pounds) than the placebo group after 2 weeks and lost almost 10 more pounds (-11.81 pounds vs. -1.91 pounds), over an inch more around the hips (-1.76 inches vs. -0.48 inches), and over an inch more around the waist (-2.12 inches vs. -0.68 inches) than the placebo group after 16 weeks. Those on Slimvance® also had improved BMI (-0.63 kg/m2 versus 0.10 kg/m2) than the placebo group after 4 weeks. Use in conjunction with the Slimvance® diet and exercise program.

*In a randomized, double blind, placebo controlled study, 70 men and women took a placebo or AlperFIT™ and followed their routine diet and exercise regimen for 12 weeks. Results from an ITT analysis of covariance showed that the increase above pre-treatment in those taking AlperFIT™ burned an additional 171 more calories per day (225.5 calories per day vs. 54.32 calories per day) than the placebo group after 12 weeks.

SCIENCE-BACKED THERMOGENIC
