

Ostinol® Insta Joint contains Cyplexinol®, a complex of proteins naturally found in bones and joints. These proteins are functionally involved in the formation of bone and cartilage tissue, while helping the body fight inflammation. Also contains Acetyl-keto-beta-boswellic acid (AKBA) extracted from *Boswellia serrata* species. Scientific data has shown that AKBA supports bone and joint health by enzyme inhibition associated with inflammatory pathways.*

SUGGESTED DOSAGE: As a supplement take one (1) to two (2) Ostinol® Insta Joint capsules one (1) to two (2) times per day or as needed. For maximum joint results, take with Chondrinol®.

WARNING: Consult a physician before using if pregnant, nursing or on medication. Do not use if inner seal is missing or broken. Store in a cool, dry place.

Keep out of the reach of children.
