Helps Regulate Alcohol Metabolism* • Block Acetaldehyde* Helps Prevent Hangovers* • Support Healthy DNA Cells* Protects Skin from Alcohol Damage*

Alcohol enters our cells and is broken down into acetaldehyde, an extremely toxic compound responsible for a host of alcohol related diseases. Ranked as one of the most hazardous compounds (worst 10%) to ecosystems and human health, our bodies are only capable of metabolizing a small amount of acetaldehyde at a time. As excess acetaldehyde enters our blood stream damage occurs to vital organs, (kidney, liver, respiratory, skin, brain toxicants) leaving us feeling ill. The EPA has classified acetaldehyde as a Group B2, probable human carcinogen.

Whether or not you drink alcohol, (Acetaldehyde also occurs naturally in ripe fruit, coffee, and fresh bread) the unique components of Anti Alcohol Anti-Oxidants work to quickly break down acetaldehyde, greatly reducing the "hangover effect".

Our recommendation is two capsules per drink starting with two capsules five minutes prior to alcohol consumption. If you forget you may take during and after drinking alcohol as well.
