QuintEssential® 0.9 BIOTERRAIN RESTORE
SACHETS

The cells of the body are bathed in mineral-rich fluids that regulate
the transport of nutrients and waste products to and from every tissue
and organ of the body. Mineral deficiencies can disrupt this delicate
fluid balance, compromising cellular function. QuintEssential® 0.9,
an isotonic blend of pristine alpine spring water and cold
micro-filtered seawater, replenishes the mineral bath surrounding
your cells, effectively restoring the integrity and vibrance of your
biological terrain. Discovered more than a century ago by renowned
biologist René Quinton, it is the original raw, unheated, naturally
balanced mineral and trace element product specifically created to
nutritionally replenish your internal biological terrain (Bioterrain).*
