

Betaine HCl/Pepsin/Gentian Bitters contains three nutritional factors that perform complementary functions designed to support the efficiency of the digestive process. Supplementing with Betaine HCl may support the stomach's digestive capacity.* Pepsin is an enzyme produced by the body to digest protein-containing foods in the stomach. Pepsin works in conjunction with stomach acid to support protein digestion.* Gentian is an herb used to optimize the digestive capacity and tonify the digestive tract. Its bitter nature may help to stimulate the body's production of digestive enzymes.*

For optimal digestive support, use this supplement in conjunction with **Best Digestive Enzymes—All Vegetarian**, a uniquely formulated, full-spectrum high potency digestive enzyme blend.
