

Suggested Use: Using the dropper, add 3 drops to water, juice, or smoothie. Drops can also be placed on or under the tongue.

The body most easily absorbs and utilizes ionically-charge iodine in its nascent form. This form of iodine is in its highest energetic-state and maintains its natural negative electromagnetic charge. This allows it to easily bond and be absorbed by the cells and body. Our Nascent Iodine is sourced from ancient salt deposits deep below the earth's crust. †

Iodine is an essential mineral that plays a crucial role in hundreds of bodily processes. It is one of the most commonly deficient minerals because it is missing from our food supply. †
