

ABOUT LIPOSOMAL VITAMIN C

Our Natural Liposomal Vitamin C capsules can help enhance the absorption of Vitamin C in the body. Sunflower Lecithin and Phosphatidylcholine help create a liposomal environment for the absorption of Vitamin C, which can help enhance its delivery into the cells of the body. Vitamin C has been shown to support a healthy immune, nervous, and cardiovascular system. It is also vital for the production and storage of collagen, which is required for healthy joints, skin, hair and wound healing. It is a powder antioxidant which can help against free radical damage and support younger looking skin.*

SUGGESTED USE:

As a dietary supplement, take two (2) capsules daily, preferably with a meal or as directed by your healthcare provider.
