“Enjoy the Naturally Sweet Taste of Sucess”

ZERO CALORIES • NON-GMO

Natural Non-Caloric Sweetener

Sucess™

**NO ADDED SUGAR,
CARBS OR FLAVORS**

**NO ARTIFICIAL
SWEETENERS**

100 Individual Packets • Net Wt 3.5 oz / 100g

SUCRESS = Sucré + Success.

 **Sucré** is the French word for “sweet” and if you combine it with the word “success,” you end up with **Sweet Success** or as we now call it, **SUCRESS**. It is well established that reduced sugar intake is essential for good health. In fact, lower sugar intake facilitates weight loss and enhances blood sugar control. Nevertheless, virtually all sugar substitutes strangely “replace” sugar with other sugars or carbohydrate. **SUCRESS** is different. No added sugars or carbohydrate. Just the clean fresh taste of our natural Stevia sweetener, along with the amino acid Glycine to help support healthy blood sugar metabolism.

STEVIA’S SWEET STORY.

Stevia seemed to burst on the scene several years ago, but by then, Stevia had already been consumed traditionally for generations in South America. Stevia is related to the sunflower and, like many plants and natural ingredients, Stevia has been used traditionally for more than 1,500 years. Apparently, it just takes a few centuries for science and industry to embrace Mother Nature’s best work. At **ProCaps Laboratories**, our interest in Stevia began decades ago; however, it was exceedingly difficult to translate the mild

sweetness of the Stevia leaf into the “sugary” sweetness that modern taste buds demand. Nevertheless, after years of research, we are proud to introduce a sweetener worthy of the Stevia plant. *Enjoy the naturally sweet taste of **SUCRESS**!*

NO HIDDEN SUGAR.

SUCRESS is our unique non-GMO Stevia leaf sweetener with none of the sugars or carbohydrate of other packeted sweeteners. Our refreshing new approach means there are no hidden sugars in your sugar substitute. Each packet of **SUCRESS** provides the sweetness equivalence of approximately 2 teaspoons of sugar, along with the healthy glycemic (blood sugar) support of the amino acid Glycine. Enjoy the pure sweet taste of **SUCRESS** without artificial sweeteners and flavors or added sugars and carbohydrate.

SUGAR. HIDDEN IN PLAIN SIGHT.

Sugar hides in unexpected places; ketchup, salad dressing, yogurt, peanut butter, bread, cereal, beverages, etc. However, there is one particularly shocking hiding place and that is in a sugar substitute. But how could a sugar “substitute” possibly contain hidden sugar? Isn’t it supposed to replace sugar? Yet virtually all of them, both natural and artificial, contain added sugars or carbohydrate. Some contain simple sugars, like

dextrose or glucose. While others include alcohol sugars, such as erythritol; and still others contain carbohydrate, like maltodextrin or inulin. It seems strange, even deceptive, to include sugars in a product intended to replace sugar, so **SUCRESS** is different. **SUCRESS** only contains our natural Stevia sweetener, along with the healthy blood sugar support of the amino acid Glycine. Finally, a healthy alternative to sugar and sugar substitutes. *Make our **SUCRESS** your success!*
