

Plant Prebiotics to Boost Gut Bacteria

Prebiotics are compounds found in plants that our gut bacteria use as food. Consuming a wide variety of prebiotics can help nourish healthy gut flora. InnovixLabs Broad Spectrum Prebiotic contains 15 types of plant prebiotics to feed different types of bacteria in different sections of the gut.*

SUGGESTED USE: Mix one level scoop with any food or beverage. If added to beverages, stir well into 6-8 ounces and drink right away. Do not heat or cook. Begin with 1/2 scoop per day for first 10 days. Increase very gradually if tolerated to one or two scoops per day. Always drink water after consumption. May be consumed with or without a meal.

Talk to your doctor before use if you are on FODMAPs diet, have bowel disorders, or gut dysbiosis, as you may need prior treatment before tolerating prebiotics. Bowel changes or bloating may occur initially.

DOES NOT CONTAIN: Dairy, eggs, fish, shellfish, tree nuts, peanuts, wheat/gluten, soy, sugar, GMO, yeast, artificial colors or flavors.

All ingredients are non-GMO and suitable for vegetarians.
