

New Discovery in Probiotic Science

New research shows there may be a connection between gut health and mood. Probiotic bacteria in the gut can influence the function and behavior of the brain. This is called the 'gut-brain axis.'*

Two unique strains with clinically studied benefits*:

Lactobacillus helveticus Rosell-52ND

Bifidobacterium longum Rosell-175

Clinical research has shown that the unique probiotic blend used in InnovixLabs Mood Probiotic may help you:

- Cope better in stressful situations.*
- Ease digestive discomfort associated with stress.*
- Support positive mood and emotional wellness.*

Individual results may vary due to the severity of imbalance in gut bacteria, consistency of product use, or if causes are unrelated to gut health.

Scientists have identified at least three mechanisms that may help explain the beneficial effect of probiotics on mood and emotions.*

1. Probiotics can help reduce establishment of bad bacteria in gut.
2. Probiotics can help support healthy cytokine balance.
3. Probiotics can help support healthy communication with nervous system.*

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

STORAGE: Store in a cool (75°F or below), dry place. Avoid exposure to high heat and/or moisture.

DOES NOT CONTAIN: Eggs, corn, fish, shellfish, tree nuts, peanuts, wheat/gluten, sugar, GMO, yeast, Chinese ingredients, artificial colors, or flavors.

ALLERGY INFORMATION: May contain trace amounts of soy and milk, used in the fermentation process.

Made in a facility and processed on shared equipment that handles dairy, soy, and gluten. Individuals extremely sensitive to these ingredients should consult a physician prior to using this product.

Warning: If you are pregnant, nursing, or taking any other supplements or medications, talk to your doctor before use. Not recommended for use by people under the age of 18. If you experience any adverse reaction, discontinue use and contact your doctor. Keep out of reach of children.

TIME FOR EFFECT: In clinical studies, those who noticed an effect required a month of regular use. Individual results may vary.
