

ANTI-CATABOLIC NIGHTTIME PROTEIN

Suggested Use: Take NutraBio Casein before bed, between meals or any time slow digesting protein is desired. Add 1 scoop with 8 ounces of cold water or your favorite beverage to a shaker cup or blender and mix for 25-30 seconds. Vary the amount of liquid to meet your desired taste and consistency. Use nonfat milk for a thicker, creamier shake.

SUSTAINED RELEASE FOR PROLONGED AMINO ACID DELIVERY

Micellar Casein is a slow absorbing protein that provides a steady stream of amino acids to muscle cells lasting 4-6 hours. This ensures positive nitrogen retention in muscles for much longer periods compared to whey protein. Casein is best taken at night or in combination with whey protein isolate after workouts to provide sustained amino acid delivery during the two most crucial times of muscle growth: during sleep and post-training.

HIGH CONCENTRATION OF BCAAs & AMINO ACIDS

Shown is the typical amino acid profile per serving which is derived from micellar casein protein only. Absolutely no ingredients have been added to spike protein values.
