GAMMA VITAMIN E

400 MG TOTAL TOCOPHEROLS
315 MG GAMMA TOCOPHEROL

180 Easy-to-Swallow Capsules

Andrew Lessman's GAMMA VITAMIN E is a unique, high potency Vitamin E formula focusing on the most protective form of Vitamin E – **Gamma Tocopherol**. It is all natural and far different from Vitamin E formulas found in stores, because it contains the most beneficial form of Vitamin E and also includes all four naturally-occurring tocopherols. For decades, Vitamin E has been among the most popular formulas to compensate for the low levels of Vitamin E in the typical American diet. Unfortunately, typical Vitamin E supplements only make matters worse, since they contain less active and synthetic forms of Vitamin E. **Gamma Tocopherol** is the most protective form of Vitamin E in nature, yet is absent from typical store-bought Vitamin E formulas. The unfortunate result is that most Americans unwittingly consume Vitamin E supplements that bear no resemblance to the Vitamin E in food. Our **Gamma Vitamin E**, on the other hand, provides 400 mg of all four natural Tocopherols (Alpha, Beta, Gamma and Delta), including more than 300 mg of all-important **Gamma Tocopherol** – Mother Nature's preferred and most protective form of Vitamin E. To assure you the greatest benefits possible, we enhance our Gamma Vitamin E with the unique balance of plant-based Omega-3 fatty acids from Ahiflower® Oil.
