240 Easy-to-Swallow Capsules

Andrew Lessman's MELATONIN 3 is designed to naturally promote restful sleep without a morning-after "hangover" by delivering a physiologically balanced level of Melatonin. Melatonin is a naturally produced hormone that is required for and directly involved in the natural sleep cycle. Our **Melatonin 3** provides levels of this protective molecule that are intended to gently facilitate sleep without dependency or side effects. We all know that restful sleep is essential to recover physically and mentally from the demands of daily life. However, unexpected events, along with the stress and pace of modern life, can frequently interfere with normal sleep. Clinical studies show that Melatonin naturally regulates our body's daily circadian rhythm (our internal 24-hour time-keeping system) that naturally determines when to fall asleep and wake up. Unfortunately, aging, excessive exposure to light in the evening or too little light during the day, as well as jet lag, shift work and poor vision can all disrupt normal Melatonin levels. Modern life is always challenging; however, a good night's sleep makes it easier to enjoy a happy, healthy life, and our **Melatonin 3** is designed to naturally support the sleep process.
