

ImmuneBody™ Colostrum is a natural supplement that provides a rich source of Immune Factors, such as Immunoglobulins, which are types of proteins that support normal gastrointestinal tract health.*

Our first milking colostrum is collected from USDA Grade "A" Dairies that do not use rBST+. ImmuneBody™ Colostrum is carefully processed to ensure optimal bioactivity and laboratory tested to verify it is naturally abundant in Immunoglobulin (IgG) to support overall health and vitality.*

*The FDA has determined that there is no significant difference between cows treated with rBST and those not treated.
