Did you know?

Approximately 5% of inhaled oxygen is converted to reactive oxygen molecules, also known as free radicals.[^]

Examples of how free radicals form:

Pollution Exposure

Normal Metabolic Processes

Cigarette Smoke

Excess production of free radicals can lead to:

Overwhelmed Antioxidant Defense System

Oxidant & Antioxidant Imbalances

Oxidative Stress

Why Lung Defense?

Specially formulated with Mullein extract plus antioxidants and beta glucan for lung & respiratory health and immune system support.[^]

Triple Action Approach

1 Immune System Support[^]

Includes clinically studied **Wellmune®**, providing 250 mg per serving of beta glucan from bakers yeast. Wellmune® beta glucan is shown to prime the immune system and support healthy immune function.[^]

2

Free Radical Neutralizers[^]

Vitamin C (free radical scavenger) and **Zinc** are essential nutrients that play important roles in nutrition, maintenance of health, and neutralizing negative effects of free radicals. Vitamin C is the most abundant antioxidant in the extracellular fluid lining of the lung.[^]

3

Oxidative Stress Support[^]

Due to the high oxygen environment, lungs are susceptible to oxidative stress. Found in relatively high concentrations in many bodily tissues, **Glutathione** plays a key role in helping to reduce oxidative stress.[^]
