PROBIOTIC PACKS

Natural Fruit Flavor Dietary Supplement
66 billion CFU†

Probiotic Packs brings you 10 different "good" strains of bacteria, plus the well known Kyo-Dophilus® blend, so your GI tract receives multiple varieties of helpful organisms in one concentrated dose.*

Daily probiotic use helps give your GI tract and immune system that extra "edge" to keep not-so-beneficial flora from disrupting the delicate balance of "good" bacteria in your gut.*

You'll naturally feel better* -- and be able to do more of the things you want to do... at home, at work, on vacation, anywhere and everywhere you go.

Every pre-measured package of **Probiotic Packs** provides 10 strains of probiotics including:

- ★ **Bifidobacterium lactis**: a friendly bacteria often found in yogurt that is known to help support immune responses.*
- ★ **Lactobacillus acidophilus**: promotes the health of your entire digestive tract.*
- ★ **Bifidobacterium longum**: keeps your digestive system running smoothly, and helps enhance your immune system.*

And to ensure the multiple strains of good bacteria thrive, I've added NutraFlora® short chain FOS for their growth and survival.
