

Curcumin nutrients (curcumin, demethoxycurcumin, bisdemethoxycurcumin) are usually poorly absorbed when taken by mouth. Proprietary *Phytosome* technology solves this problem. In Curcumin Phytosome Featuring Meriva® each curcuminoid molecule is individually complexed with molecules of the vital cell membrane nutrient phosphatidylcholine (PC). By facilitating curcumins' entry into human cells and tissues, PC gives this product superior bioactivity over non-phytosome curcumin supplements.

Curcumin Phytosome featuring Meriva® is clinically validated to:

Deliver curcuminoids with enhanced stability and superior bioactivity*

Promote healthy functioning of the joints, eyes and other organs*

Support healthy management of C-reactive protein*
