& protect

DIRECTIONS FOR USE

- ☒ **Take 2 capsules daily with food. If more intensive support is required, the dose can be increased to 4 capsules daily.**
- ☒ **For optimal absorption, it is recommended to divide the daily dose morning and evening.**
- ☒ **Do not exceed the maximum daily dose.**

Take Omegaflex with food for optimum absorption.

If taking any medication, seek professional medical advice before taking this product. **Pregnant or lactating women and children under twelve years should not take glucosamine.** This product should not be used as a substitute for a balanced diet.

Store in a cool, dry place away from direct sunlight and away from children.

UK Patent No: 2 409 644
International PCT Patent Application No: PCT/GB2004/005461

Omegaflex is an advanced formulation containing a patented blend of effective nutrients that replenish and protect the joints. The specially selected natural ingredients in Omegaflex protect joints against oxidative stress, support connective tissue and maintain healthy collagen formation and normal cartilage function. Omegaflex combines glucosamine hydrochloride & omega-3 EPA from wild anchovies with GLA from cold-pressed virgin evening primrose oil, molybdenum & vitamins C & E. These active ingredients work synergistically to provide comprehensive nutrition for healthy joints.

Vitamins C & E contribute to the protection of cells from oxidative stress. Vitamin C contributes to collagen formation and cartilage function required for joint support and also helps maintain the normal function of the immune system during and after intense physical exercise.

Omegaflex is a rich source of molybdenum, which contributes to normal sulphur amino acid metabolism. Sulphur-containing amino acids are found predominantly in cartilage and other joint-supporting tissue.

- ✓ **Hypoallergenic glucosamine hydrochloride (non-shellfish-derived)**
- ✓ **Omega-3 EPA from sustainable wild anchovies and certified free from PCBs, mercury & dioxins**
- ✓ **Free from: dairy, gluten, lactose, shellfish, soya, yeast**
- ✓ **Not tested on animals; non-GMO**

The natural ingredients in Omegaflex are highly bioavailable, ensuring optimum absorption and utilisation in the body. Taken daily, Omegaflex provides effective support for the joints as part of a healthy and balanced diet.
