

FibroBoost® contains Seanol®, a unique polyphenol complex from brown algae (*Ecklonia cava*). Polyphenol compounds are abundant in plants and their intake is associated with many important health-promoting qualities.* Seanol® is a potent, marine-based source of polyphenolic compounds with strong antioxidant properties.* Unlike most land-based polyphenols that are hydrophilic (water-soluble), Seanol® contains hydrophobic compounds that are able to cross the blood-brain barrier, allowing for antioxidant support of the brain and neural tissues.*

FibroBoost® has been studied for safety and efficacy for nearly two decades and has been found to support the heart, memory function, joints, muscle function, immune function, a healthy inflammatory response, and healthy metabolism.*
