

EGCG (EpiGalloCatechin Gallate) and the other green tea catechin polyphenols have remarkable protective effects on DNA, anti-oxidant enzymes and other important biomolecules. Their versatile actions help maintain healthy function in the blood vessels, bone, brain, immune system, prostate, skin and other organs, however, oral absorption is limited. In **GreenSelect® Phytosome™**, EGCG's bioavailability is doubled due to its molecular bonding with phosphatidylcholine (PC), a vital nutrient that is very well absorbed and co-transporters ("chaperones") EGCG into the blood.

Superior EGCG Bioavailability*

Versatile Whole-Body Protection*

Powerful Support for Circulatory Health*
