

Nutritional Support for Healthy Bones.*

Children's need for vitamin D has never been greater. Use of sunblock and sunscreen, as well as indoor activities such as video games and movies on demand, have sharply reduced children's exposure to the sun, their natural means of producing vitamin D. Experts recommend additional supplemental vitamin D—in particular the bioavailable active form vitamin D3—for optimal growth and long-term health.*

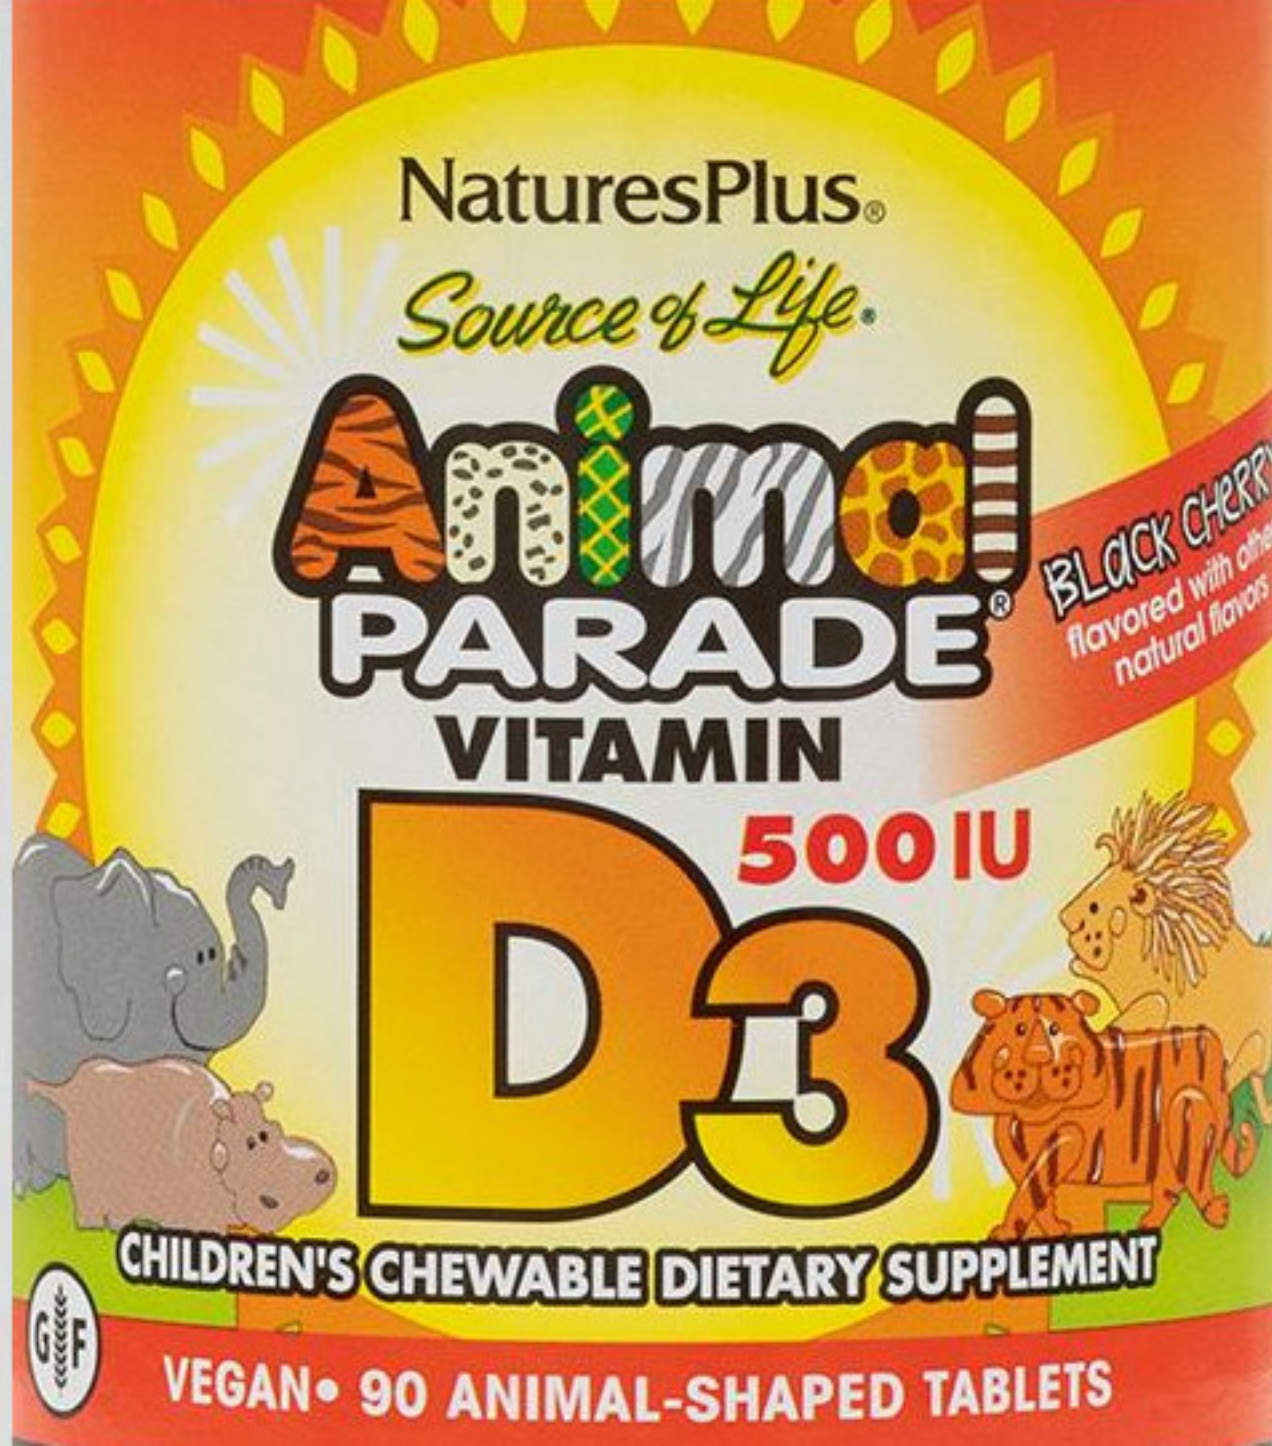

Animal Parade® Children's Chewable Vitamin D3 500 IU has a delicious black cherry flavor and the fun animal shapes children love.

Conforms to the strictest standards for purity, including California's Proposition 65. Free from all of the major allergens identified in the U.S. Food Allergen Labeling and Consumer Protection Act.
