

PureWay-C® Sustained Release Vitamin C is a unique form of the essential nutrient vitamin C that contains vitamin C lipid metabolites. In fact, it's the most advanced vitamin C available. PureWay-C® has been studied in comparison to several other well-known forms of vitamin C.

Lab studies show that PureWay-C® has superior uptake, bioavailability and retention in cells, as well as more potent free radical scavenging capabilities than other forms of vitamin C, making it the preferred supplemental form on the market today.* This increased bioavailability means PureWay-C® has the potential to more potently support healthy neuron function and enhanced immune system activity as compared to other forms of vitamin C.* PureWay-C® is all-natural, GMO-free and allergen-free.
