

PROLAB® Glutamine is a flavorless, easy-mixing powder and an extremely versatile free form amino acid formula. Glutamine is the most abundant, naturally occurring amino acid in muscle tissue, but it can be depleted during prolonged training. Supplementing with **PROLAB Glutamine** replenishes depleted stores, to help build new lean muscle and protect hard-earned gains, by supporting protein synthesis — the manufacturing of new muscle proteins. L-Glutamine also supports acid-base homeostasis. **PROLAB Glutamine** supports post-workout muscle energy replenition, volumization and repair. This "conditionally essential" amino acid functions as a critical factor in muscle form and function.* You do your part. We'll do ours.®
