

PROLAB® N-Large2™ Mass Gainer is a powerful mass gaining support formula designed to promote muscle size and recovery on the hardest gainers. We emphasize the amount of protein per serving since it is the essential nutrient that promotes muscle mass.†

PROLAB® N-Large2™ Mass Gainer also contains a special blend of carbohydrates to help fuel and support weight training. Fat, although shunned by some, is a highly concentrated energy source (double that of protein or carbohydrates).

A diet too low in fats may actually impair growth. Fat is also a necessary component in many processes, most importantly, hormone production. For these reasons, small amounts of fat are contained in **PROLAB® N-Large2™ Mass Gainer** 52 grams Mass Gainer Whey Protein. For best results, combine **PROLAB® N-Large2™ Mass Gainer** with a sensible diet and intense training program.†
