Hormone levels affect your body in many ways resulting in:

- Fatigue*
- Menstrual cramps*
- Mood swings*
- Difficulty losing weight*
- Occasional PMS*

EstroBalance®* with DIM® promotes:

- Natural support for estrogen balance and efficient fat metabolism*
- Breast wellness and healthy cell development*

Many women today have high estrogen levels due to stress, diet and environmental exposure to estrogen-like materials. These high levels, known as estrogen dominance, can disrupt the estrogen-progesterone ratio, which increases your need for hormone balance.
