

L-Arginine is an amino acid, which provides energy to all cells throughout the body. L-Arginine can naturally be found in red meat, poultry, fish, and dairy products. When consumed in the body, L-Arginine changes into nitric oxide, a powerful neurotransmitter that may help blood vessels relax and improve circulation. By improving circulation, L-Arginine promotes faster work-out recovery from exercise, and improves the work capacity of active muscles.* L-Arginine is also known as a growth-hormone releaser, which can lead to increased lean muscle mass, strength and power.* L-Arginine also improves the process of clearing waste from your muscles, which may result in a reduced sense of fatigue.*

If you are pregnant, nursing, taking any medication(s), planning any medical procedure or have any medical condition, consult your doctor before use. Discontinue use and consult your doctor if any adverse reactions occur. **KEEP OUT OF REACH OF CHILDREN. DO NOT USE IF SAFETY SEAL IS DAMAGED OR MISSING.**
