Recommended Use: As a dietary supplement, mix 30 grams (approx. one scoop) in eight ounces of water or any other beverage per day, or as directed by your health care practitioner.

PaleoPea is a natural pea protein isolate, offering a high level of nutritional benefits. It is produced with a natural fermentation process which uses no chemical solvents. The raw materials, North American grown yellow peas, are not genetically modified (non-GMO).

PaleoPea is ideal for individuals on a dairy-free diet, or anyone who is looking for a vegetarian protein with high digestibility. It has an excellent array of amino acids, including high levels of BCAAs (branched chain amino acids). PaleoPea's amino acid profile is particularly high in arginine, leucine and lysine.

Notice: This is a natural product that may exhibit color, taste, and density variations from lot to lot. It contains naturally occurring nutrients; therefore amounts may vary within the pea protein and profile.
