

GastroSoothe® dietary supplement is a unique extract of deglycyrrhized licorice widely used in Europe. It's chewable, because saliva enhances the effect of DGL's natural compounds. In DGL, the glycyrrhizin — a compound associated with high blood pressure — has been removed.

Recommendations: Chew two tablets as acid indigestion occurs.* If symptoms return, repeat up to two more times daily, or as directed by your healthcare practitioner.

If pregnant, nursing, or taking prescription drugs, consult your healthcare practitioner prior to use.

ETI is an FDA-registered Drug Establishment.

Contains no sucrose, fructose, yeast, wheat, gluten, corn, soy, dairy products, artificial coloring, artificial flavoring, preservatives, or ingredients of animal origin. This product contains natural ingredients; color variations are normal.
