

Resveratrol is a special type of antioxidant, called a phytoalexin. It's found in the Polygonum cuspidatum plant, also known as Japanese Knotweed. Antioxidants protect your body's cells from the normal, but damaging, process of oxidation.* It may play a role in promoting healthy aging due to its antioxidant properties, in addition to supporting normal cell replication.*

SUGGESTED USE: As a dietary supplement, adults take one (1) veggie capsule daily or as directed by a health care professional.

CAUTION: If you are pregnant, nursing, taking any medication(s) or have any medical condition, consult your doctor before use. Discontinue use and consult your doctor if any adverse reactions occur.
