

MSM is a bioavailable form of sulfur, which is necessary for the proper function of the body's skin, hair and nails, connective tissue, amino acid production, and immune system.* Sulfur must be consumed each day for healthy function and growth of the body.*

Glucosamine sulfate is up to 90% absorbable, which makes it more readily available to the body to support healthy articular cartilage.* Clinical studies show it's a key building block for connective tissue and cartilage.*

Enzymatic Therapy's GS-500 was the first glucosamine sulfate product in the United States.

OptiMSM® is a registered trademark of Bergstrom Nutrition.

If pregnant, nursing, or taking prescription drugs, consult your healthcare practitioner prior to use.
