Serving Size 1 VegCap

|                                                                                                                                                                       | Amount Per Serving | % Daily Value |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---------------|
| Broccoli ( <i>Brassica oleracea italica</i> ) (seed extract) (Guaranteed to contain 35 mg [10%] Sulforaphane Glucosinolates and Supplying Myrosinase Enzyme Activity) | 350 mg             | *             |
| Myrosinase Enzyme ( <i>Brassica oleracea italica</i> ) (Thioglucosidase)                                                                                              | 13 mg              | *             |
| Organic Freeze-Dried Broccoli Sprouts ( <i>Brassica oleracea italica</i> )                                                                                            | 50 mg              | *             |

\*Daily Value not established.

**Other Ingredients:** Vegetable Cellulose Capsule and Calcium Ascorbate.

**Discussion:** Broccoli is a cruciferous vegetable in the brassica family. Broccoli contains a unique class of phytochemicals known as glucosinolates, including glucoraphanin. When broccoli is consumed, chewing breaks down the glucoraphanin with the support of an enzyme called myrosinase. When glucoraphanin and myrosinase are mixed together, the compound known as sulforaphane is produced. Solaray® Activated Broccoli Seed Extract supplies the myrosinase enzyme to support this process. Freeze-dried broccoli sprouts are added to this formula because they contain both glucosinolates and myrosinase enzymes.
