

Probiotics with a Purpose™

Probiotic All-Flora®

Live Probiotics for Optimal Digestive and
Immune System Function*

Probiotic All-Flora contains nine strains of live probiotics cultured together on a non-dairy whole-food medium and then combined with growth-stimulating *prebiotic* organic apples and organic inulin sourced from organic Jerusalem artichokes.

The live probiotics in **Probiotic All-Flora**, including revered probiotic strains such as *Lactobacillus acidophilus*, *Lactobacillus rhamnosus*, and *Lactobacillus helveticus*, help support optimal digestive and immune system function.*

When the culturing of **Probiotic All-Flora** is complete, the synbiotic-rich whole-food medium and live probiotics are freeze-dried together, a process that preserves their potency until consumed. Once consumed, the cultured whole-food medium and *prebiotic* whole foods activate the probiotics and enhance their effects. Both are part of the synergistic whole that benefits the entire digestive tract and immune system.*
