

Daily Immune Defense featuring **Epicor®** contains three novel factors that powerfully support immune health and wellness.* **Epicor®** is a nutritive dried yeast fermentate of *Saccharomyces cerevisiae* (used in baking and brewing) that supports cellular metabolism and modulates immune function.* In vitro lab data has shown that **Epicor®** activates Natural Killer (NK) cells.* **Emed-OLE™** is a premier extract of olive leaf that has a high concentration of oleuropein, a powerful phyto-antioxidant that has shown an ability to regulate immune function.* **Immunolin®** is a high quality purified protein isolate high in immunoglobulins and beneficial growth factors that are known to support immune system wellness.*

Daily Immune Defense featuring **EpiCor®** also contains 2000 IU of vitamin D3 and 30 mg of zinc per dose. Vitamin D3 is known to powerfully modulate immune function and the activity of immune cells, and promote innate immunity.* Zinc promotes immune wellness by supporting the body's T-cell response and enhancing the body's immune resistance.* Copper is included to maintain a healthy zinc-copper ratio, as each mineral competes with the other for absorption. A proper balance of the two is important for health.*

Modulates Immune System Function*
Promotes Optimal Immune Health and Wellness*
