

Ultra Ginkgo! powered by Phytosomes™ not only supports improved short-term memory and mild memory problems associated with aging, but it also dramatically improves the ability of ginkgo's key compounds to get where they're needed most—to the cells in your body.* The proprietary process provides exceptional absorption and delivery to targeted sites. Studies indicate that this increases the antioxidant activity of the brain compared to non-Phytosome ginkgo.* Why settle for less?

This formula contains ingredients with approved German Commission E monographs. The German Commission E is the worldwide recognized authority for effective herbal remedies. If pregnant, nursing, or taking prescription drugs, consult your healthcare practitioner prior to use.

ETI is an FDA-registered Drug Establishment.
