Discussion: Essential B Vitamins are necessary for proper metabolism and energy production. B Vitamins help support for healthy hair and skin, nerve impulse transmission, immune system function and red blood cell formation. This two-stage, timed-release formula is designed to release half of the ingredients rapidly and the other half gradually over a period of up to 8 hours,** which may help extend the availability of these vitamins to the body over a longer period of time.

**Based on in-vitro dissolution tests designed to simulate the digestive process. Individual results may vary.
