

Dihydromyricetin is extracted from the hovenia dulcis tree. Studies show it may be useful as an Alcohol Consumption Support Supplement. It may support the body and brain's ability to process alcohol.*

Suggested Use: Take one or two capsules per three alcohol drinks consumed before going to bed, ideally with a glass of water. A larger dose can be taken if preferred and usually produces better results.

Storage: Store in a cool, dark place. Do not freeze or expose to moisture or heat above room temperature.
