

IMMEDIATELY REPAIR YOUR MUSCLES.

Recovery is a must have product for anyone training and competing at any level. Branch Chain Amino Acids (BCAAs), Essential Amino Acids (EAAs), and Alpha-Ketoglutarates (AKGs) are all included in this bottle. Many companies have BCAAs because they are commonly available. However, it is rare to find a product with EAAs and AKGs due to the high cost that many companies try to avoid. These are critical to proper recovery and you will feel the difference these ingredients make for you. Recovery is a product you can take 3-4 times per day at an average dose of 3-4 capsules.

These ingredients are found in products like chicken, fish, and steak. They are broken down and delivered to you in their purest form so your body can instantly receive their benefits. These are safe to take at any age and at any level.

AstraGin™ is an all-natural ingredient that can significantly increase the bioavailability of amino acids, glucose, and vitamins by about 50% by allowing a greater amount of these nutrients to pass from the blood stream into the cells.*

SUGGESTED USE: Take 6 capsules immediately after activity to begin repairing muscles. As a daily regimen: take 3-4 capsules, 3-4 times per day.
