SAME GREAT FORMULA!

#1 PROTEIN | USA FORMULA | 1 IN SCIENCE | GOLD LABEL | 20 YEARS OF EXCELLENCE | GUARANTEED BANNED SUBSTANCES TESTED | GMP Manufactured in the USA to cGMP standards for all dietary supplements

Superior Science. Superior Results.™

- NO Proprietary Blends
- NO Undersdosed Key Ingredients
- NO Banned Substances
- NO Fillers
- NO Hype
- NO Exceptions

The Most Powerful Protein Formula Ever Developed

NITRO-TECH® is a scientifically engineered whey + isolate lean musclebuilder formula designed for all athletes who are looking for more muscle, more strength and better performance. NITRO-TECH® contains protein sourced primarily from whey protein peptides and whey isolate – two of the cleanest and purest protein sources available to athletes. NITRO-TECH® is also enhanced with the most studied form of creatine for even better gains in muscle and strength.*

• 70% Better Than Regular Whey Protein for Gains in Lean Muscle

[1] In a 6-week, double-blind study involving 38 test subjects with at least 3 years of weight training experience divided into 3 groups, subjects combining the core ingredients in NITRO-TECH® with a weight training program gained 70% more lean muscle than subjects using regular whey protein (8.8 vs. 5.1 lbs.) and increased their bench press more than subjects using regular whey protein (34 vs. 14 lbs.). These same subjects even gained 4 times as much lean muscle as subjects using a placebo (8.8 vs. 2.0 lbs.).* This formula provides 30g of protein from ultra-pure protein. Plus, it delivers a clinically proven dose of creatine.

• Build More Strength Than Regular Whey Protein

Each scoop of NITRO-TECH® contains a research-proven dose (3g) of creatine monohydrate.* Combined in NITRO-TECH®, whey protein and creatine build more strength than regular whey protein. In one study, subjects using the whey/creatine combination in NITRO-TECH® increased their 1-rep max bench press by 34 lbs., compared to only 14 lbs. for subjects using regular whey protein.*

• Ultra-Clean Protein Formula

A single scoop of NITRO-TECH® contains 30g of protein, primarily from whey protein peptides and whey isolate, with only 3g of carbs and 2.5g of fat! Most protein powders deliver significantly less protein per scoop, while some protein formulas are loaded with fat and carbs. The whey protein in NITRO-TECH® has been filtered using Multi-Phase Filtration Technology for less fat, lactose and impurities than cheaper protein sources.

See Supplement Facts for cholesterol content.

• Best-In-Class Taste

Every flavor of NITRO-TECH® won in head-to-head, third-party taste tests against leading competitors.

• Get More for Your Money

Unlike the competition, Performance Series products contain superior key ingredients in clinically dosed amounts that are fully disclosed, so you know exactly what you are paying for.

Research conducted and published in a scientific journal shows that subjects using the core ingredients in NITRO-TECH® gained 8.8 lbs. of lean muscle in 6 weeks, compared to subjects who used regular whey protein and gained 5.1 lbs.* **These results are based on testing at St. Francis Xavier University.**

Other Ingredients: Isolate Protein & Peptide Blend (Whey Peptides, Whey Protein Isolate, Whey Protein Isolate 97%), Whey Protein Concentrate, Natural and Artificial Flavors, Gum Blend (Cellulose Gum, Xanthan Gum, Carrageenan), Soy or Sunflower Lecithin, Beet Juice (Color), Salt, **Enzymtec** (Papain, Amylase), Calcium Carbonate, Sucralose, Citric Acid, Malic Acid, Acesulfame-Potassium. **Contains milk and soy ingredients. Processed in a facility that also processes wheat, egg, tree nut, peanut, fish and shellfish ingredients.**

▲These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

This product contains 3g of creatine per serving, which is in addition to the 30g of protein per serving shown in the Supplement Facts. Creatine in combination with whey protein has been clinically shown in a published study in the *International Journal of Sport Nutrition and Exercise Metabolism* to be more effective for building muscle than just whey protein alone. There are no added amino acids combined within this formula that are counted towards the total amount of protein listed on the label.
