RESEARCH-BACKED INGREDIENTS. CLINICAL DOSES. FULL TRANSPARENCY. ALL POWER.

New Test HD Lean Build Black Onyx® is the most advanced 2-in-1, testosterone-enhancing and musclebuilding pill. It's built with multiple scientifically researched ingredients shown in four separate human clinical studies to boost free testosterone, enhance performance and build lean muscle.▲

► Scientifically Researched Testosterone Enhancer

Featuring researched doses of KSM-66® ashwagandha and boron shown in separate human clinical studies to promote total testosterone and boost free testosterone – most competitors have none! Free testosterone is the most active form of testosterone and is critical to initiating the muscle- and strength-building process. Test HD Lean Build Black Onyx® is also armed with maca, tribulus, safed musli and longjack, plus zinc to help support optimal testosterone production within the normal range.▲

Naghii et al., 2011. *Journal of Trace Elements in Medicine and Biology*. 25:54-58.

► Powerful Musclebuilding & Strength

Three ingredients make this a powerful performance enhancer: exclusive and patented Cindura®, mTOR-activating PEAK ATP® and clinically dosed KSM-66®. Cindura® has been clinically shown to support muscular strength, boost endurance and increase mass. What's more, researchers believe Cindura® may help prevent muscle breakdown. In fact, in a 6-week clinical study, subjects taking the amount of Cindura® found in 3 tablets of Test HD Lean Build Black Onyx® significantly increased their muscular endurance by an average of 6.6 reps vs. just 2.2 reps by the placebo group when tested via leg extensions.▲

Check out the gold standard clinical studies below to see how Cindura®, PEAK ATP® and KSM-66® are clinically shown to enhance performance, boost strength or increase lean muscle.▲

A Randomized, Double-Blind and Placebo-Controlled Study on Cindura, unpublished manuscript, 2015.
