

**Inflamma-Less®** - Nature offers a different approach to promoting comfort, mobility and flexibility. Botanical extracts, proteolytic enzymes, and targeted nutrients are combined in this product to create a powerful 3-pronged formula that supports the body's natural inflammatory response.\*

**Quality Assurance** - Irwin Naturals® is committed to providing the highest quality products for your health. We employ compliance testing to ensure purity and potency.

**Global Responsibility** - Over the years we have donated to organizations that support the environment and the health of our children.

**Patented BioPerine®** - Our special BioPerine Complex enhances the bioavailability, absorption and potency of many nutrients.\*

**Ayurvedic Herbs:** Indian botanicals have been used traditionally to support a healthy tissue response to physical stress and may positively influence feelings of discomfort due to strenuous physical activity.\*

**Proteolytic Enzymes:** Proteolytic enzymes are protein-digesting enzymes.\* When taken with meals, these enzymes can help to breakdown food nutrients.\* But when taken in between meals (away from food), these enzymes may have beneficial effects on tissue response to stress, overexertion, strenuous physical activity and exercise.\*

**Targeted Nutrients:** Vitamins, minerals and bioflavonoids can help to protect cells and support the body's own natural tissue formation.\* This advanced combination of ingredients also includes Omega-3 Fatty Acids from Fish Oil.\*

**What makes us different:**

**Liquid Soft-Gels** - The nutrients in these easy-to-swallow Liquid Soft-Gels are released fast. Other forms of delivery can contain binders and fillers that may cause stomach upset and offer no nutritional value. Advanced Liquid Soft-Gels provide an optimum delivery system.
