SWISSE ULTIBOOST VITAMIN C + MANUKA HONEY is a premium quality, great tasting formula containing vitamin C and New Zealand Manuka honey to help support healthy immune function and maintain healthy antioxidant activity.*

Manuka Honey: Formulated with Manuka honey from the Taranaki region in New Zealand, where the bees are left in the native forest all year round so that pure, pristine honey can be harvested. Manuka honey is rich in phenolic acids, which are antioxidant compounds.*

Immune Function: The immune system is composed of cells and molecules organized into specialized tissues, which act as the body's first line of defense. Vitamin C helps support healthy immune function.*

Antioxidant Support: Vitamin C contains antioxidant properties to help protect cells against free radical damage.*

Botanical Source: Contains acerola, a tropical fruit native to Latin America. Acerola is known for its natural vitamin C content.

RECOMMENDED USE:

Chew two tablets daily, during or immediately after a meal, or as directed by a healthcare professional. Do not swallow whole.

Do not use if you are allergic to bees or bee products. If you are pregnant, nursing, taking any medication or have a medical condition, please consult your healthcare professional before use.

Not suitable for infants and children. Keep out of reach of children. Do not use if inner seal is broken.
