

“I knew I could create formulas that would truly change lives.”

Dr. Stephanie Redmond

Our story....

As a doctor of pharmacy and certified diabetes educator, I've focused my entire career on helping people manage and reverse diabetes with natural therapies and as few medications as possible. There are medical studies that show incredible benefits from combinations of specific herbs, vitamins, and minerals when used at the correct doses.

I was frustrated that there were no products available that contained **enough of** or **the right** active ingredients. Using medical research, I formulated my own products so that patients could get the most effective combination of ingredients, at high enough doses, with fewer pills, and from one trusted source.

With my high-quality innovative blends, you can feel confident you are getting natural supplements that are truly worth taking.*

Capsules

A DIETARY SUPPLEMENT

What is Insulin Resistance?

In type 2 diabetes, the body's insulin doesn't work as well as it should ... causing the pancreas to overproduce insulin (a fat storing hormone).

“Insulin resistance can make weight loss very difficult. This natural formula can help you BREAK THE CYCLE!”

Dr. Stephanie Redmond

HOW IT WORKS:

- Helps block a digestive enzyme that absorbs sugar
- When taken with meals, promotes healthy after-meal blood sugar levels
- Supports healthy insulin function
- Regulates sugar cravings

Additional **lifestyle tips** and **diet considerations** are included in every box!

Supplement Facts

Serving Size: 1 Capsule
Servings Per Container: 45

	Amount Per Serving	%DV*
